Customize Experience After Sign Up

Choose Affiliated Party

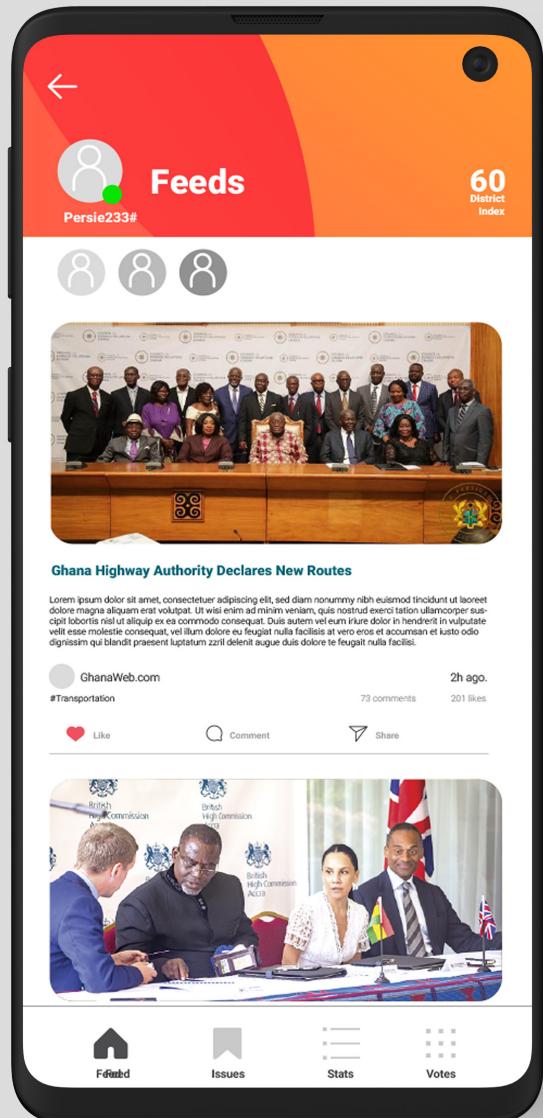

Choose affiliated party to get recommended news in your interest and bills supported by your party leaders.

Pick Your Location

After choosing your location by entering or using the GPS, you get to know the reps for your locality.

Choose Issues

Choose issues that relate with you to get recommended posts concerning the issue in the form of news in the feeds, bills, petitions, and protests .

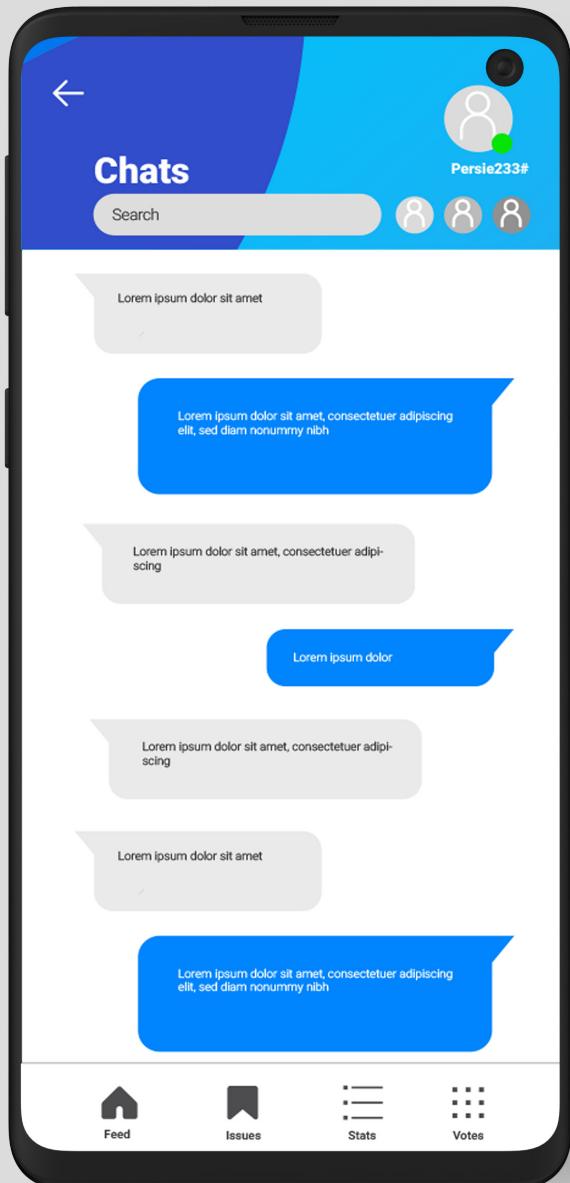

insider

About the Feed Page

The feed page sources news from popular Ghanaian sources and recommends the news that fall under your issues interests. The user can like the posts and comment on the posts, as well as share them onto social media.

The District Index is a measure of how well the district is developing and links to statistics concerning development. On top has the Reps of the user's district and notifies the user when any of the reps makes a posts or supports a bill, petition or protest

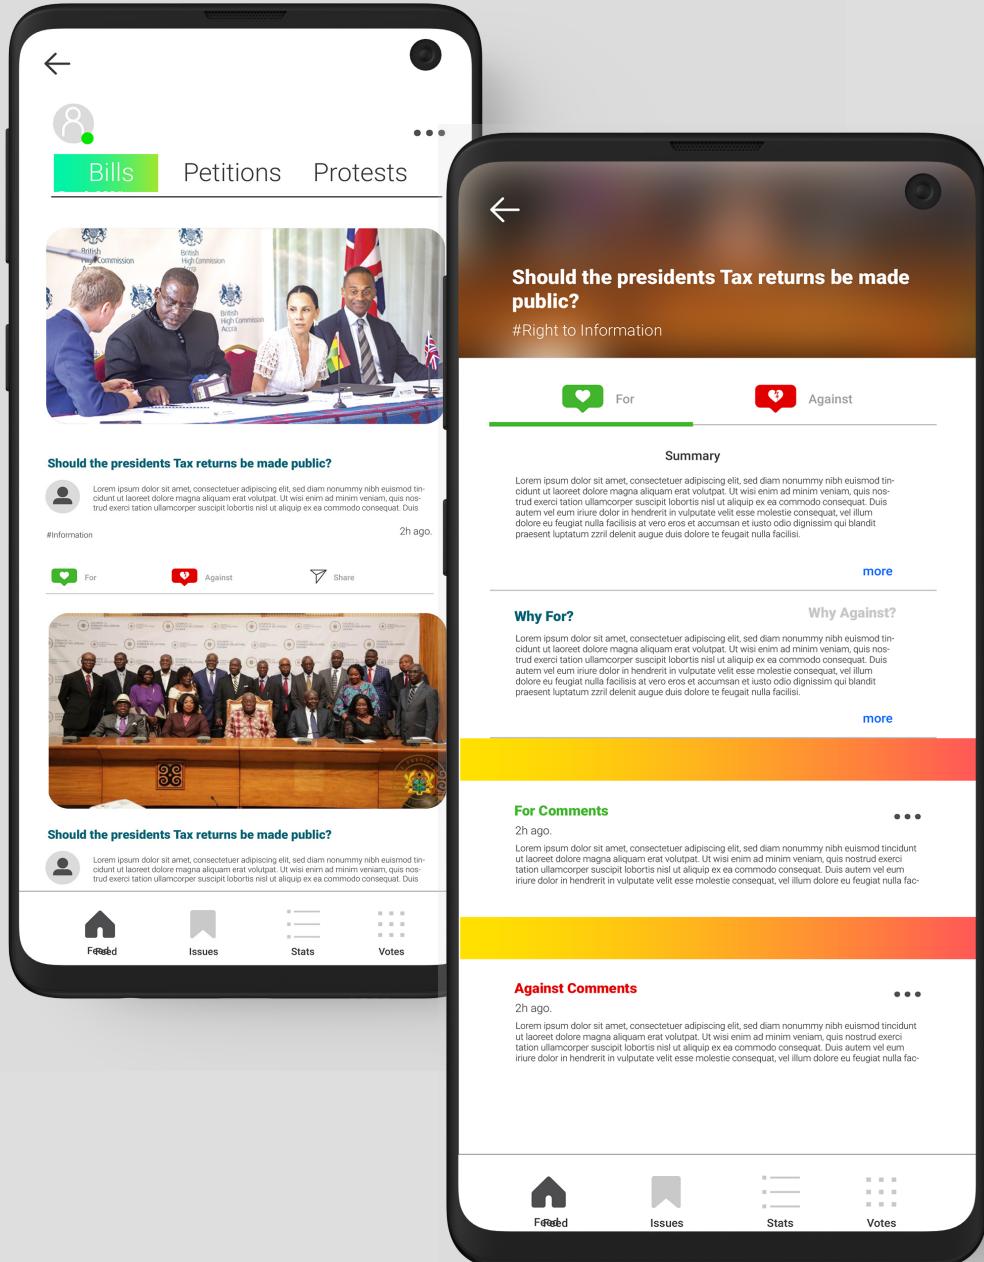

insider

About the Chat Page

Tapping the button on the right (Chat Button) presents the Chat Screen from the top for quick access. The chat is powered by two core functionalities: **Anonymity and GeoLocation**

Users are free to chat with anyone within a mile radius on interesting political issues and matters. The model is based on the get-together model. This is made possible using the GPS. Users are also protected by allowing them to chat with complete anonymity.

insider

The Issues Page

The Issues page now gives the user power to exercise his or her democracy.

Bills

Users get updated with bills in Parliament that their reps support first in the list before any other bill. The user can be for or against the bill to show his or her stance.

On clicking the bill, the user is presented with more details concerning the bill: The importance of both stances and comments by other citizens. The user is notified of the stance of his or her reps as well on the bill.

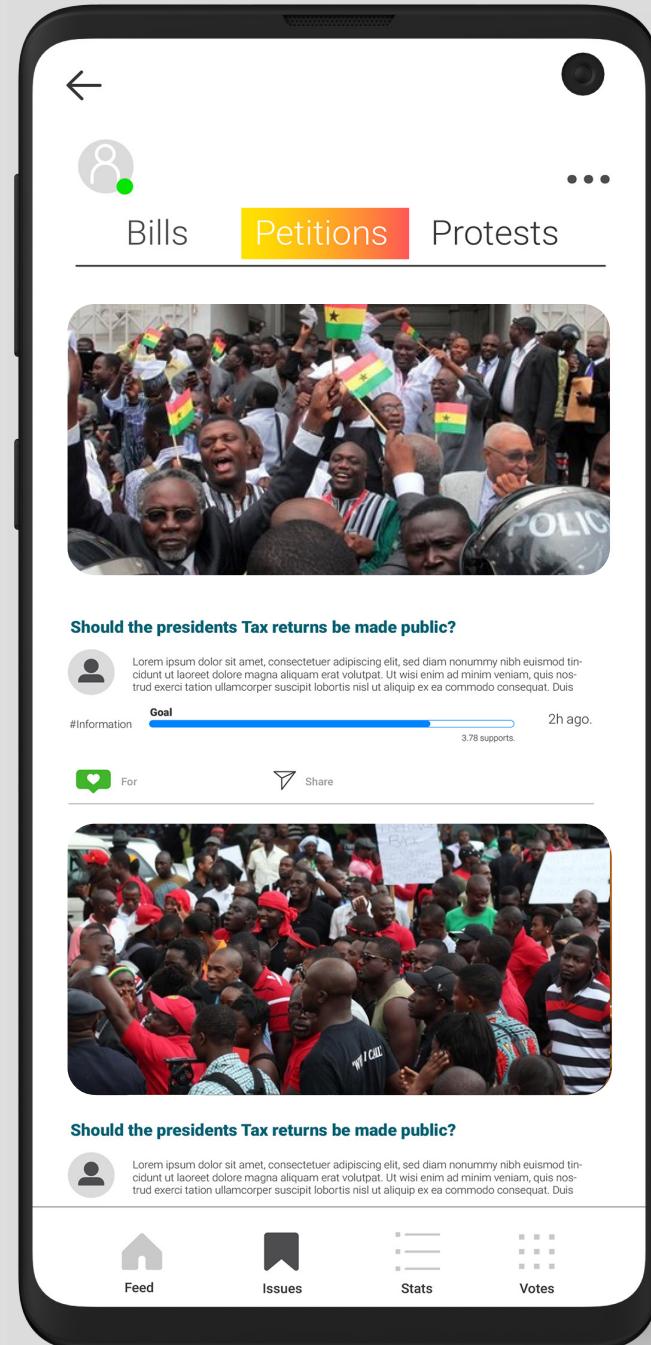

insider

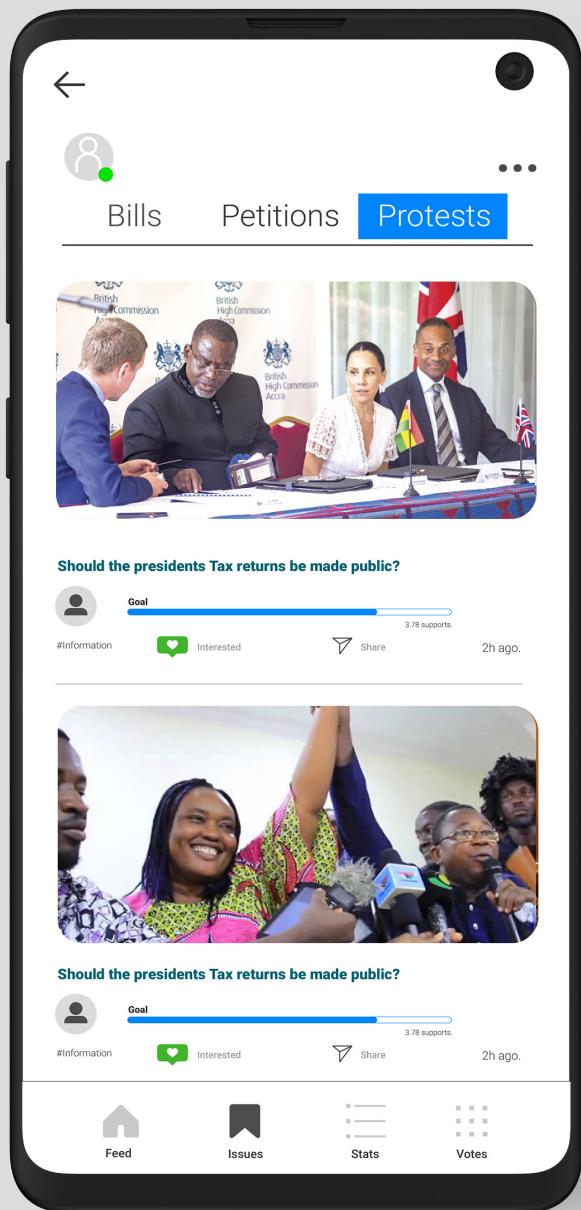

The Issues Page

Petitions

Users can create petitions and set goals for others to vote on. Once the goal is attained, the necessary reps are notified of the issue and given the details from the petition creators.

Users can see which of their reps support the said petitions as well.

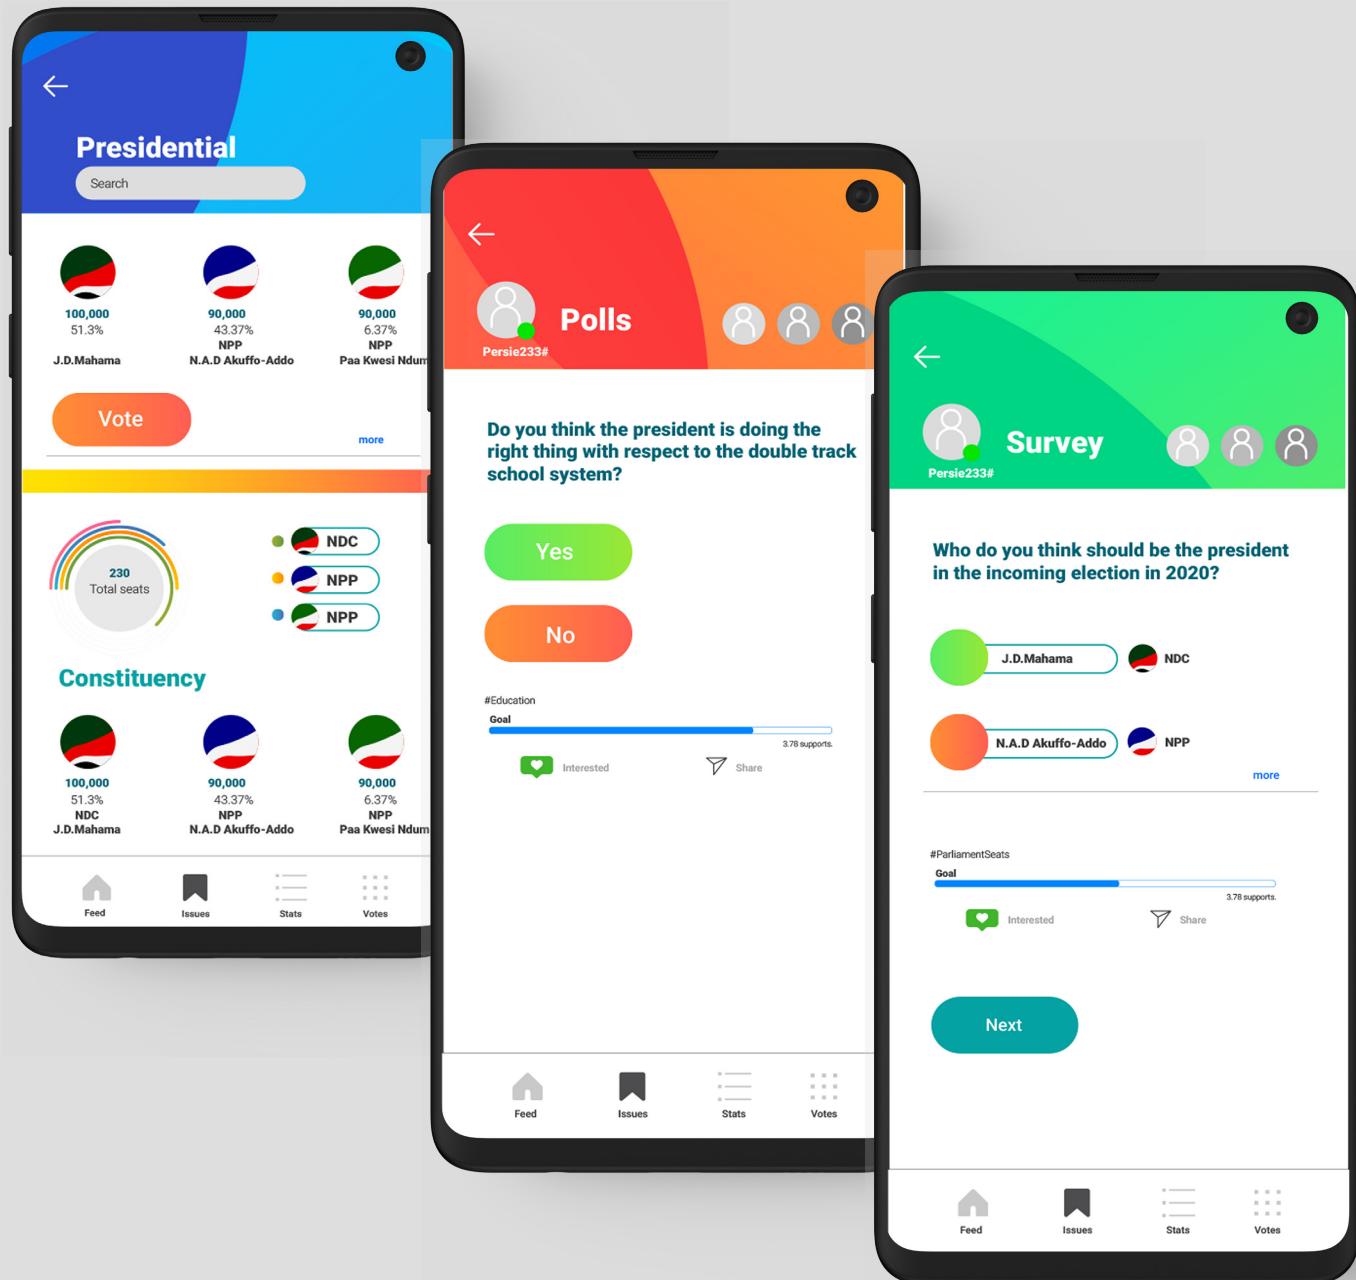

insider

The Issues Page

Protests

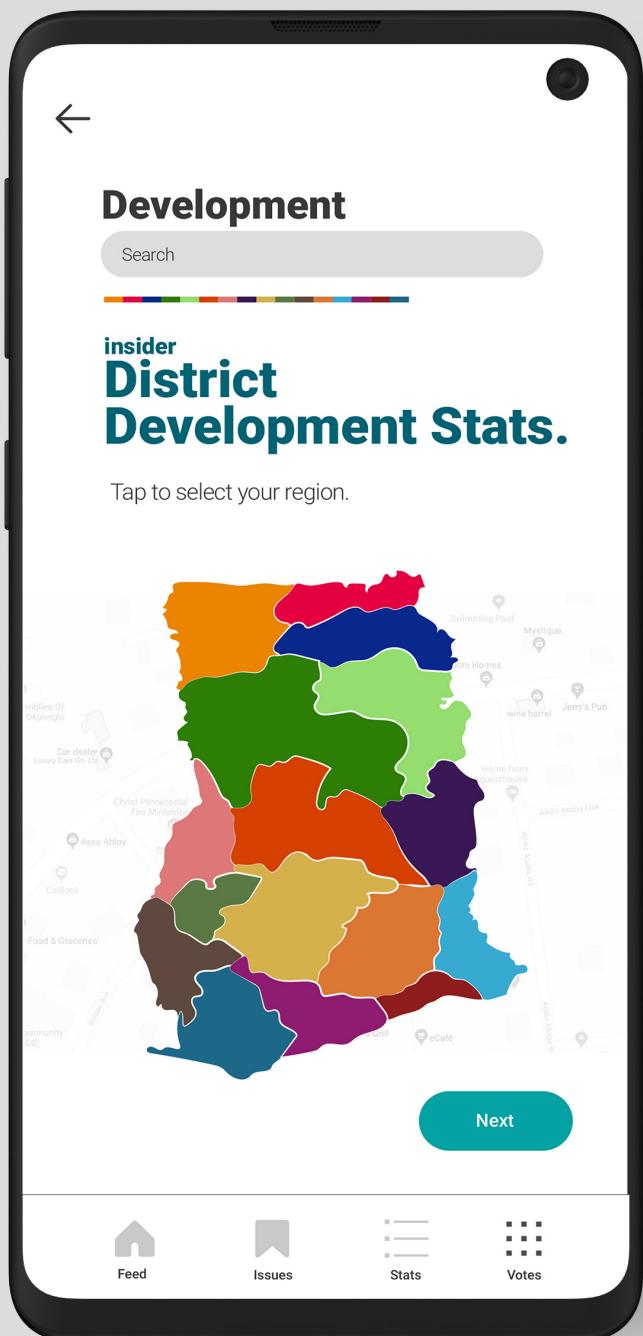

Users can create protests and set goals to make the protests a reality. The necessary parties needed to hold a peaceful protest are notified of the action to make this possible.

Note: All features in the Issues page need the user to be verified before able to create or vote on the issues.

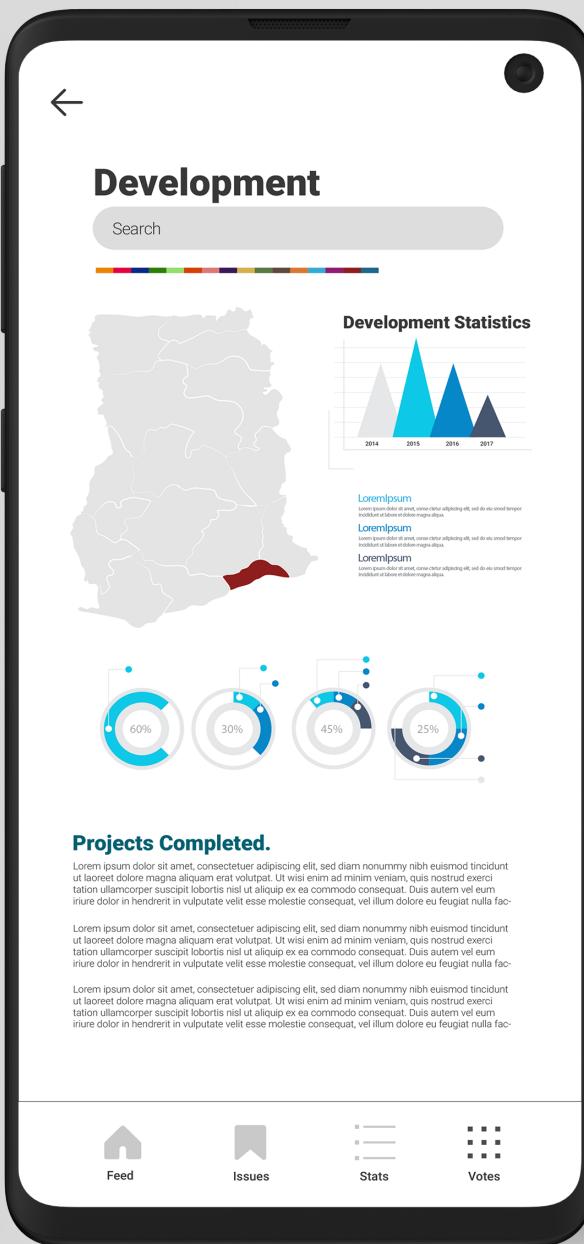

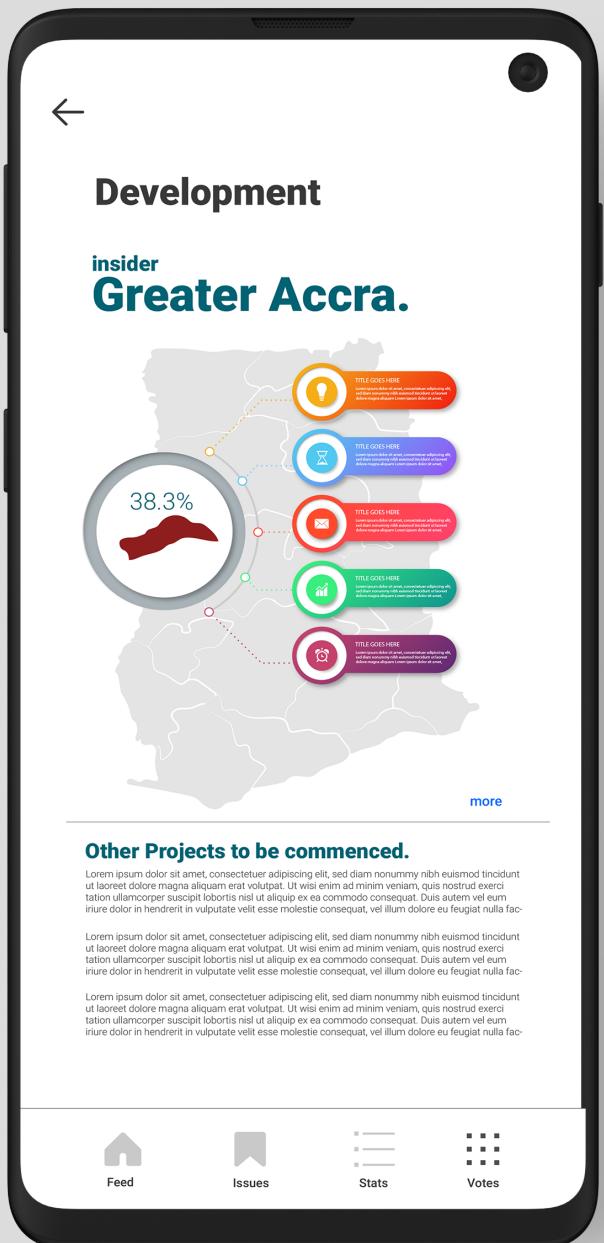

insider Vote

The Vote page contains polls and online elections organized periodically on the reps of the user's locality. Presidential polls will also be held against most likely competitors for users to vote on. The page also shows the real-time data of any poll held. The user must be verified before voting to ensure accurate projections .

insider Stats

The Stats page provides statistics of the district, constituency of the user and country. The data comprises basic census statistics about the development of the district, and other relevant data to the user .

Other Features

What Goes Into Verifying A User

Any user who wants to make any decision in the Issues page, use the chat feature or vote on Vote page needs to be registered and verified. Verification requires the user to input the voter's ID number and that is used to verify the identity of the user. This will legitimize data that is generated through the app .

Profile Page of Reps

Reps of each locality will be created and a profile maintained of the rep. The profile contains contact and office information and achievements of the rep for the community. Reps will be allowed to claim their account and use afterwards to be users on the platform to support bills, petitions, and protests. Profile .

Ensuring Maximum Reach

The evidence is clear that not everyone in the country will possess a mobile device capable of running the full features of the app. One way forward that is under consideration is using a USSD or SMS method to host some important features of the app and to give everyone the opportunity to express their views

[This feature is still under consideration] .
